

# Cargo Manager

**Solves container loading and vehicle loading problems**

**Delivers major time & money savings**

***The innovative CargoManager system is a specialist software tool that potently helps organizations reduce their packaging, storage and transportation costs as a result of better resource use throughout the supply chain.***

The powerful yet simple to use CargoManager system helps maximize space utilization in a freight container, trailer or pallet ... indeed in any rectangular based enclosure.

Its widespread user application shows the system will deliver major cost savings across a diverse range of products and industries.

It produces single or multiple load plans and naturally caters for a wide spectrum of practical loading constraints – including the loading of heavy items, pallets, fragile goods and so on, into single or multiple containers.

Users include Guinness UDV, Hotpoint, TDHG Logistics, Arjo Wiggins, Fellowes and Meyer Prestige.

## Key capabilities

- Provides a rapid and accurate tool for order enquiry response. For example: "How much more of product-A can be loaded?" Which container/trailer size is most suited to a specific cargo set?"
- Eliminates unnecessary waste of fuel and materials, thereby reducing storage and transportation costs.
- Saves transportation costs as a result of more efficient cube utilization.
- Alleviates the tedium of repetitive manual calculations and removes the risk that the specified cargo does not fit.

- Provides warehouse staff with diagrams and load lists showing how a container should be loaded.
- Provides a natural link between product design, warehousing and distribution functions.

## Key software features

- Easy to use windows applications with a logical and well proven solution sequence.
- Unique solution techniques meeting practical needs (eg priorities, fragility, multi-container loads) well proven in user companies worldwide.
- Quick and easy data entry (from keyboard or file) and storage, together with rapid solution calculation and display.
- User selection of both 2D and 3D loading reports (screen and printer and to email) to the level of detail required for the specific situation in question.
- User access to a fully customizable range of packing control parameters.
- On-line help and full on-line manual
- User configurable language options.
- User oriented support teams and ongoing support services.
